Project Title: Earthworm Website

<https://en.wikipedia.org/wiki/Earthworm>

I'd like to build this site as multiple pages. Typical site navigation can be across the side or top or curve through the page as an earthworm does – as long as it does not disrupt but rather supplements the flow of the content. Please include text and visual/imagery on the pages on the following subsections:

- **Introduction** – set the tone for the site and briefly introduce what the viewer will retain from their time/experience browsing the site about earthworms
- **Anatomy:** Form and Function, Digestive System, Excretory System
- **Life and Physiology:** Reproduction, Regeneration
- **Economic Impact**
- **Earthworms in Visual Media** (creative agency to the designer to include any visual media regarding/of/about earthworms the find interesting)
- **Sources**
